Running 3PL businesses

efficiently since 1987!

■ Solutions Overview

■ WMS

The **3PLink®** Warehouse Management Solution is a set of modules built to manage orders, inventory and billing of a 3rd Party Public Warehouse operation. [Learn More](#)

■ TMS

■ BMS

Testimonial

"3PLink incorporates all of the advanced tools and technology that ensure our data's reliability. We chose 3PLink as the critical technology to link our operations with our client's needs, allowing us to deliver unparalleled customer service."

Sunland Distribution

Camelot 3PL Software has been developing software solutions for the 3rd Party Logistics industry since 1987. Intelligently designed for rapid implementation, lowest cost of ownership, and operational efficiency, our software solutions leverage the latest, advanced technologies.

3PLink is an integrated suite of applications built to manage a world-class 3rd Party Logistics operation. Whether it's a Public Warehouse, Fulfillment House, Freight Brokerage, or Transportation Company 3PLink can handle it with ease.
